## **Boater Safety Alert**

Starting on or about June 23, 2025, Weeks Marine will begin to shift GDC's cofferdam eastward.

The Hudson River Ground Stabilization (HRGS) project will fortify a section of the riverbed to enable tunnel boring machine operations for the future Hudson River Tunnel.

Starting on or about June 23, 2025, a Weeks 526 barge will be on the north side outside of the cofferdam to install a moveable wall pipe girder. The barge will then shift to the south side to pull piles from the west, lay them on a deck barge, and shift to the east to reinstall them. The effect will be that the cofferdam will slowly "leapfrog" east over the summer months. Hours of operation are 12 hours a day, 6 days a week, Monday through Saturday. All vessels are encouraged to navigate the area with caution and use the western side of the navigable channel.

For more information, please reference the United States Coast Guard (USCG) Notice to Mariners (available at <u>USCG.mil</u>). Safety is our #1 priority. The Gateway Development Commission will continue to keep the boating community updated as this project progresses.

The Gateway Development Commission provides this information as a public service. Any reliance you place on such information is therefore strictly at your own risk. Nothing in these guidelines shall supersede the actual construction conditions and regulations set forth by the U.S. Coast Guard.
