

CONSTRUCTION NOTICE

WHAT: Noise Barrier Post and Panel Installation
WHERE: Along the south side of W 18th Street
WHEN: July 15—August 15, 2025
 7:00 am to 3:30 pm (Weekdays)

Beginning July 15, Schiavone Lane Dragados JV (SLDJV) will begin installing steel posts and sound-absorbent panels along the outer edge of the Hudson County Construction Site. This work is part of ongoing efforts to reduce construction-related noise impacting the community and follows the recent completion of the noise barrier foundations.

Crews will use excavators and cranes to set the upright steel posts, then stack aluminum panels within the posts to a final height of 25 feet.

No impacts to local parking or traffic are expected, and noise levels during this work are not anticipated to exceed contract limits.

Questions or Concerns?

Email: PalisadesTunnel@gatewayprogram.org

General Project Overview – The Palisades Tunnel Project will use tunnel boring machines (TBMs) to excavate two parallel tunnels—measuring approximately 5,100 feet long with an inside diameter of 25 feet—through the rock formations of the Palisades. The project also involves building the new Hudson County Shaft, which will be used to remove the TBMs when digging is complete. The project contractor is Schiavone Dragados Lane Joint Venture (SLDJV).
