

## CONSTRUCTION NOTICE

**WHAT:** Lighting Installation at Project Site

**WHEN:** Monday, September 8, 2025

**WHERE:** Hudson County Shaft Site

We wanted to inform you about the installation and use of temporary lighting at our project site, which will be activated following sunset to support our second shift operations. Below, we provide details about the work, lighting setup, and our commitment to minimizing impacts on the surrounding community.

The second shift will focus on shaft work at the project site. A soundwall has been installed to capture and reduce noise. Additionally, all trucking operations will cease at 10:00 PM to further limit disturbances.

**Below are key details about the lighting installation:**

- **Lighting Placement and Direction:** All lights will be mounted on the soundwall and fencing, directed downward and inward toward the project site. This design ensures minimal ambient light spillover, so residents should not experience significant light pollution.
- **Lighting Operation:** All lights will be turned off at the end of the second shift when the last worker exits the site, ensuring no unnecessary illumination during non-working hours.
- **Community Feedback and Adjustments:** We are committed to addressing any lighting concerns promptly. If any lights cause issues, they can be repositioned or redirected. Our team will closely monitor the project hotline email to respond quickly and resolve concerns from the outset.
- **Power Source:** All lights are powered by the onsite substation, eliminating the need for generators. This ensures no additional noise will be associated with the lighting system.

We value your understanding and cooperation as we work to complete this project safely and efficiently. If you have any questions or concerns, please contact our project hotline email, which will be monitored closely to ensure a prompt response.

Thank you for your patience and support.
