

BOATER SAFETY ALERT

- WHAT:** In-river installation of marine temporary structures
- WHERE:** Hudson River, near Pier 66 and the Hudson River Bulkhead
- WHEN:** As soon as October 8, 2025, up to Monday – Sunday, 7AM – 7PM

In addition to the ongoing Hudson River Ground Stabilization cofferdam operation, and as part of the Manhattan Tunnel project, GDC's contractor will begin installing marine temporary structures to hold equipment that will stabilize the ground underneath the Hudson River.

In early October, GDC's contractor will bring a 150' x 69' Work Barge "JFB 4550" with Liebherr LR1300 Crane and a 150' x 40' Scow "Angela" barge near the Hudson River Bulkhead. These barges will be used to install beams, drive piles, and construct pile caps.

All boaters should only use the western side of the navigable channel, maintain a 200' buffer to structures and barges, and use extreme caution around all areas of the work. For more information, please reference the United States Coast Guard (USCG) [Notice to Mariners](#).
