

## CONSTRUCTION NOTICE

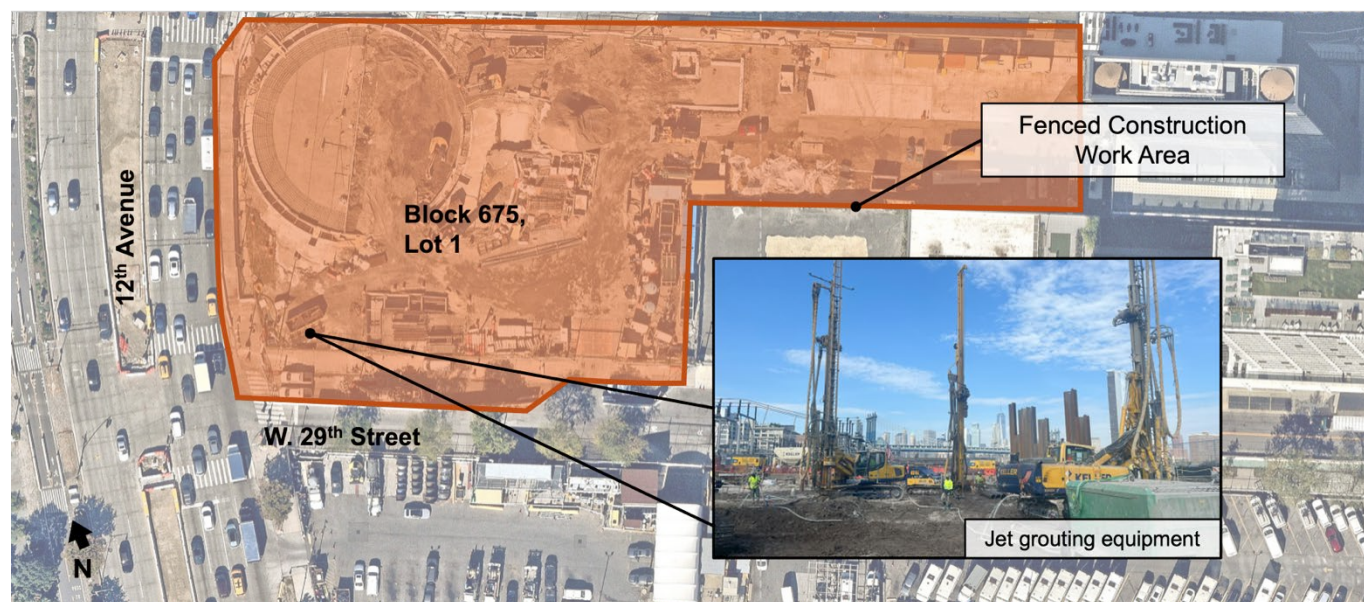

- WHAT:** Jet grout testing activities
- WHERE:** Fenced area of Block 675, Lot 1 (12th Avenue near W. 29<sup>th</sup> Street)
- WHEN:** As soon as December 12, 2025, for approximately one week  
Weekdays between 7:00 AM – 11:00 PM

As part of the Hudson Tunnel Project, GDC's contractor will be performing test jet grouting operations within the fenced boundaries of Block 675, Lot 1. Jet grouting involves injecting a mixture of cement, air, and water under high pressure into the ground. This will stabilize the soil creating the right conditions for constructing a tunnel access shaft.

Following this testing, long-term jet grouting operations are planned from approximately first quarter 2026 to first quarter 2027.

**NOISE IMPACT:** Noise may reach levels comparable to heavy street traffic during jet grouting operations. Noise monitoring will be in place to ensure activities are kept within allowable limits. As much as possible, loud activities will be avoided during nighttime periods.

**TRAFFIC IMPACT:** NO TRAFFIC IMPACTS. All work will be confined to non-traffic areas within the work zone. Closure of W. 29<sup>th</sup> Street remains in place.
