

Boater Safety Alert: Additional Buoy Installation

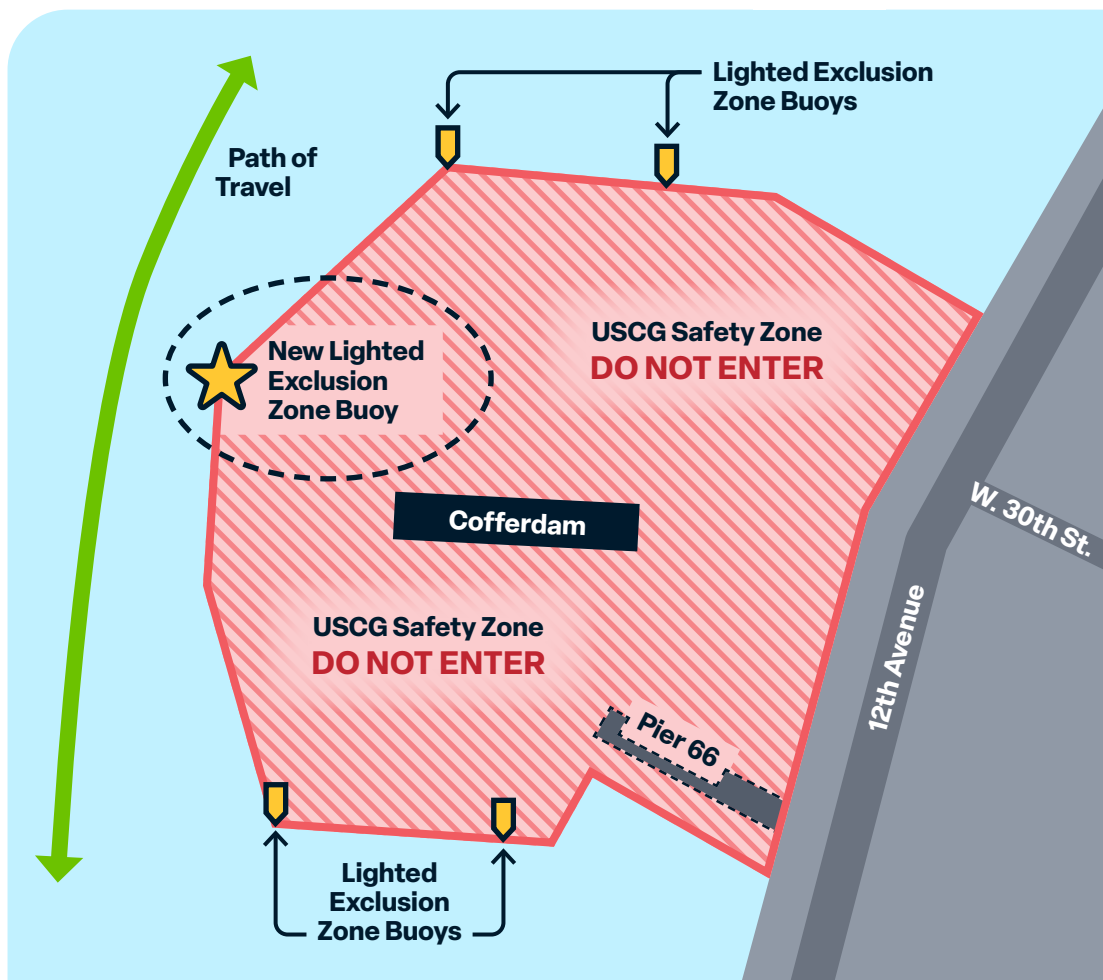

When: By October 9, 2026

Where: Hudson River within the Hudson Tunnel Project USCG Safety Zone

As of May 1, 2026, the United States Coast Guard (USCG) established a safety zone around Hudson Tunnel Project (HTP) construction operations in the Hudson River. No vessels, except for vessels involved in the construction activities associated with the HTP, are allowed to enter into, transit through, or anchor within the safety zone unless specifically authorized by the Captain of the Port.

By October 9, Gateway Development Commission's contractor will add an additional Lighted Exclusion Zone Buoy (★) on the west side of the safety zone to provide an additional visual reference to operators. All mariners shall continue to transit to the west of the safety zone and are reminded that special attention should be paid to potential damage caused by their own wake.

For more information, please reference the [USCG Local Notice to Mariners](#).
